

“When I visited Duke,
I could see myself here.”

- LUKE STEWART T'07

Luke Stewart T'07 sees great possibility in his math/computer science double-major. He helped a neurobiologist analyze data from Duke's Lemur Center, and he's working with a math and physics professor to study how gravity bends light in deep space. In his free time, Luke is launching an online business with a friend, and this summer, he's traveling to a research institute in Belize to help forecast HIV rates and to teach.

Affording Opportunity
DUKE'S FINANCIAL AID INITIATIVE

Luke is the son of a state of Maryland correctional officer and a computer systems analyst, and he is attending Duke as a Reggie Howard Scholar. This scholarship program helps support and recruit students of African heritage who demonstrate leadership potential. Luke is grateful for the award and for the community of scholars he has found. “It was a blessing to get a scholarship at a place where I knew I'd be able to grow.”
